

TRAINING COURSES

Chem/Bio Device Identification Lecture

Workshop Objective: This sixteen-hour workshop goes beyond basic device awareness by providing extended in-depth coverage of the electrical/electronic control portion of an Improvised Explosive Device (IED) or Improvised Dispersal Device (IDD). The various components and circuits typically encountered in terrorist devices are addressed through overviews of basic electronic theory, basic IED and IDD recognition, basic IED and IDD components, and basic IED and IDD circuits. Upon completion of this workshop, participants will have a more thorough knowledge about the theory and construction of improvised explosive and dispersal devices.

Facility Requirements: This workshop is designed to be conducted in a classroom-style environment. Electric and an overhead projector will be required.

Cost: The cost of this workshop is \$3000 and attendance is best limited to 15 participants. This cost will vary with travel expenses and city per diem. Actual costs will be recalculated based upon location and travel expenses to that location for the dates requested. Call us directly at 410-436-3313 for final cost estimates and to schedule a workshop date.

Payment: Payment should be received in full 30 days prior to the workshop start date to allow for materials purchase and travel order processing.

Please Note: Due to the sensitivity of the material being presented, only law enforcement professionals and military EOD are permitted to attend.
